One register of everything the organisation owns

Every asset the organisation owns — laptops, machines, vehicles, buildings and their spaces — in one register with custody events that never lose the trail, lifecycle with contracts and licences, and the work that keeps them running against the same asset the accountant and the HR officer see.

Family	Rutba Suite
Category	Asset & facilities management software
Status	Early access
Apps included	2
From	\$9 per user / month
Works with	Rutba People, Rutba Books, Rutba Manufacturing
Buy or trial	rutba.io/suites

THE PROBLEM

Why it exists

Business software collects assets in three places and none of them agree: the HR list of issued kit, the fixed-asset register in accounting, and the machine records the plant keeps. Rutba Facilities is one register. HR issues from it, the ledger depreciates from it, and — when M4 lands — maintenance schedules work on it. The custody trail is insert-only, so who had what and when it was returned is a record rather than an argument.

FIT

Who it is for

- Companies whose asset list lives in three spreadsheets and one Strapi table
- Facilities teams tracking service contracts, licences and inspections
- Manufacturers who want machines and hand tools in the same register
- Any organisation whose auditor keeps asking where the laptops went

APPS IN THIS PRODUCT

What you get

Assets

The register of everything owned that is not stock: custody, lifecycle, contracts on things, licences, vehicles and audits.

Facilities

Sites and spaces, leases, requests and orders, the statutory register, contractors, bookings, and health and safety.

WHAT IT DOES

Capabilities

- One asset register the whole estate reads from
- Custody as insert-only events — who had what and when it was returned
- Sites, buildings and spaces, with assets attached to each
- Lifecycle with contracts, licences and warranty dates
- The financial twin: cost, salvage, method and useful life for the ledger
- A machine profile on the same row, when maintenance needs it
- Statutory-inspection catalogue as data, so due-date lists match the jurisdiction
- Joiner and leaver checklists issue and reclaim equipment from the same register

COMMERCIAL

Plans and pricing

PLAN		
	PRICE	INCLUDES
Starter	\$9 per user / month	Asset register with custody events; Sites and spaces; Contracts and licences; HR joiner and leaver seams
Growth	\$19 per user / month	Everything in Starter; Requests and orders with tasks, parts and labour (M4); The statutory register, contractors and bookings; Machine profile on assets that need it; Statutory-inspection due-date lists; Priority support
Enterprise	Custom annual contract	Multi-site with per-site permissions; Custom inspection regimes; Integration with plant and BMS; Dedicated support

Prices are in US dollars and exclude local taxes. Every plan is billed through rutba.io/suites. Annual and multi-product pricing is available on request.

Worth knowing

Early access means M0–M3 shipped 2026-09-03 — the register with custody events, sites and spaces, lifecycle with contracts and licences — and the work engine behind requests and orders is M4. The statutory-inspection catalogue starts UK-first. One thing worth knowing if you are also buying production: a machine is an asset, so the maintenance app in Rutba Manufacturing and this product are two surfaces over one work engine rather than two registers of the same things. Neither is a copy of the other and you never reconcile them.

RUTBA SUITE

How it fits the rest of the suite

Rutba Suite is 22 products across three lines — the business suite, the workspace and the platform services underneath — sharing one customer list, one catalog and one set of books. Buy the one you need today; the rest slot in without a migration.
