- What you get
- Capabilities
- Plans and pricing
- How it fits the rest of the suite
- Talk to us

The signature is the easy part. The evidence is the product.

Send agreements for signature by link, to people who need no account — and get back a sealed, hash-chained record of who was invited, how they proved who they were, what they saw, and what they agreed to.

Family	Rutba Workspace
Category	Electronic signature software
Status	Coming soon
Apps included	3
Works with	Rutba Drive, Rutba CRM, Rutba Books, Rutba People
Buy or trial	rutba.io/suites

THE PROBLEM

Why it exists

Anyone can put a picture of a signature on a page. What decides a dispute two years later is whether you can still show what happened: who opened it, from where, what disclosure they accepted, in what order, and that not one byte has moved since. Rutba Sign records that ceremony as it happens, hash-chains it so it cannot be reordered or thinned, and seals it — and the counterparty can verify the result without an account, without trusting us, and without paying anything.

FIT

Who it is for

- Businesses sending contracts, quotes and engagement letters for signature
- Anyone who needs a signed agreement to hold up later, not just look signed
- Teams tired of paying per seat for a product their clients use once

APPS IN THIS PRODUCT

What you get

Sign

Compose an envelope — documents, parties, signing order, fields, expiry — then track it and collect the sealed result. Designed in full, including the milestone that builds it. No code yet.

Signing engine

The envelope, the append-only evidence ledger, and the seal over the completion manifest. The evidence model is specified down to the row. Nothing is built.

Verify

The public check: present a completed package, get valid, tampered or unknown. No account, and free forever. The service exists and is reachable; every endpoint answers "not built yet" on purpose.

WHAT IT DOES

Capabilities

- Signing by link — your counterparty needs no Rutba account
- An append-only, hash-chained record of the whole ceremony
- Identity evidence you choose per signer: email, phone code, access code, location
- A certificate of completion that never claims more than was actually verified
- Documents pinned by hash on arrival and never rewritten
- Ordered, parallel or mixed signing, with approvers and cc parties
- Public verification that works without an account or a subscription

COMMERCIAL

Plans and pricing

PLAN		
	PRICE	INCLUDES
Pay as you go	Custom per envelope	Charged when an envelope is sent, not when it completes; No per-seat charge for the people who sign; The full evidence record and certificate on every envelope; Public verification, free and permanent
Subscription	Custom per month	A monthly envelope allowance; Templates and bulk send; Your own branding on the signing ceremony; Reminder and expiry policy set once for the organization
On your own licence	Custom part of your suite licence	Runs on your instance, not a shared one; Signed documents land in your own Drive; Quote acceptance, offer letters and contracts signed in place; Your organization roles decide who may send

Prices are in US dollars and exclude local taxes. Every plan is billed through rutba.io/suites. Annual and multi-product pricing is available on request.

Worth knowing

Nothing is built yet. The product is designed in unusual detail - the evidence model, the identity ladder, the compliance gates for US ESIGN/UETA, UK and EU eIDAS, and the categories it will refuse outright - and that design is what is on this page. Two things are already decided and worth knowing now: visible marks on the pages of an uploaded PDF arrive after the evidence record does, because a signature is made valid by the record rather than by the picture; and a customer who stops paying keeps every completed envelope and its evidence, permanently. Verification stays public and free for the same reason.

RUTBA SUITE

How it fits the rest of the suite

Rutba Suite is 20 products across three lines — the business suite, the workspace and the platform services underneath — sharing one customer list, one catalog and one set of books. Buy the one you need today; the rest slot in without a migration.
